DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informalities: The examiner suggests to change "a signal burst" to "signal burst samples" in step (a) of claim 1 to avoid the indefiniteness of claim 1 because in steps (b) and (c), "said received burst samples" are being recited. The examiner also suggests to define "LS" as Least Square in step (e) of claim 1.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 1, 6, 7, 12, 15, and 18 recite the processing of an algorithm but do not provide tangible result. Claims 1, 6, 7, and 18 recite an estimation of an updated DC offset, A_1 , and a channel impulse response (CIR) via a perturbed LS CIR estimation representation modeling received burst $r(n)$...; and removing DC offset from stored burst: $r(n) - A_0 - A_1$; however, it is not clear how A_1 can be calculated via the equation given as a function of r_j .

Art Unit: 2611

Claims 2-5, 8-11, 13, 14, 16, 17, 19, 20 are rejected as incorporating the deficiencies of claims 1, 7, 12, 15, and 18 upon which they depend.
